CIS-350
Infrastructure Technologies
Group Lab 4 Report

Group #: 4   **Student Name(s):** Charles Degboe, Dalton Karl, Daniel Willinger, Anthony Stripe

Though this is a Group Lab 4 Report, you must work this hands-on Lab 4 individually. After **you do that, get in groups, discuss and provide answers to the following problems, and submit this report, <u>one per group</u>, to Blackboard. When you work Lab 4 hands-on, you are likely to do better on Test 3 which will cover the operating systems part of the course.**

You must login to your Ubuntu Linux account on the Mercury server and work all of the commands in file 🗋 CIS-350-Lab4-Linux Command Prompt.pdf. **If you follow the Lab 4 instructions carefully, you should have all the required directories and files stored in your Linux home directory (/home/your_login_name; for example, /home/jmzura01). After you submit Group Lab 5 Report (the last one), I will log in to the Linux account of every student to check if the hands-on work was done for Labs 3-5. If I do not see any activity you will get 0 out of 50 points. If I see partial activity, you will earn between 0 and 50 points. If I see full activity, you will get 50 points. No excuses please and no makeup work.**

NOTE 1: Linux commands, filenames, options, etc. are **case sensitive**. The vast majority of them is written in **lower case**. For example, filenames John, JOHN, and john represent three different files.

NOTE 2: You should find the answers to all questions below in the documents named 🗋 CIS-350-Lab3-Linux Command Prompt.pdf, 🗋 CIS-350-Lab4-Linux Command Prompt.pdf, 🗋 CIS-350 Unix-Linux Features, Commands and Utilities.pdf, and the recorded demo of Labs 3-5 and on Panopto and/or MS Teams.

Circle the correct answer.

1. Which of the following commands would you use to create a new file named *LastNames* using a *nano* editor?
a. pico lastnames
b. pico LastNames
c. nano LastNames
d. emacs LastNames
e. vi LastNames

2. Which of the following commands would you use to modify a file named *FirstNames* using a *vi* editor?
a. pico firstnames
b. pico FirstNames
c. nano FirstNames
d. emacs FirstNames
e. vi FirstNames

3. If you compile a C program named *Prog5.c* with the command *cc Prog5.c*, what will the default name of the object code be if compilation is successful?
a. a.out
b. out.a
c. Prog5.out
d. ./a.out
e. Prog5.c

4. Which of the following commands would you use to compile program *Prog1.c* written in C language?

a. *cc Prog2.c*

b. *cc Prog1.c   or   gcc Prog1.c*

c. *c Prog1.c*

d. *./Prog1.c*

e. *cc Prog1.cc*

5. Which of the following commands would you use to display the directory in a long form, including invisible files? Use piping to prevent the listing to scroll off the screen.

a. *ls*

b. *ls | more*

c. *ls -al*

d. *ls -al | more*

e. *ls -l | more*

6. Which of the following commands would you use to sort in the descending order the data coming from a file named *LastNames* and <u>redirect</u> (<u>route</u>) the output to a file named *LastNamesSorted*? Execute the command in <u>foreground</u>.

a. *sort -r > LastNames > LastNamesSorted*

b. *sort -r < LastNames > LastNamesSorted &*

c. *sort -r < LastNames > LastNamesSorted*

d. *sort < LastNames > LastNamesSorted*

e. *sort < LastNames >> LastNamesSorted &*

7. Which of the following commands would you use to sort in the ascending order the data coming from a file named *LastNames* and <u>append</u> the output to a file *LastNamesSorted*? Execute the command in <u>background</u>.

a. *sort > LastNames >> LastNamesSorted*

b. *sort < LastNames >> LastNamesSorted &*

c. *sort -r < LastNames > LastNamesSorted &*

d. *sort < LastNames < LastNamesSorted*

e. *sort -r < LastNames >> LastNamesSorted &*

8. Which of the following commands would you use to grant <u>yourself</u> (the owner) the <u>read</u> authority and <u>write</u> authority and deny <u>execute</u> authority to a file named *LastNames*?

a. *chmod u+rwx LastNames*

b. *chmod u+r-wx LastNames*

c. *chmod a+r-wx LastNames*

d. *chmod o+r-- LastNames*

e. *chmod u+rw-x LastNames*

9. How would you use the *alias* command to change the name of the *ls* command to the name *list* for the <u>current</u> log in session?

a. *alias ls=list*

b. *alias list=ls*

c. *ls=list*

d. *list=ls*

e. *change ls to list*

10. What is the sequence of the two commands/keys that you would use to <u>start</u> (record) and <u>end</u> your interactive session with Linux, and save it in a file named *LinuxLab4*?

a. Type *script LinuxLab4* (to start) and hit *CTRL-D* to end.

b. Hit *CTRL-D* (to start) and type *LinuxLab4* to end.

11. Which of the following commands would you use to display the terminal control-key settings?
a. *stt -a*
b. *st -a*
c. *stty -a*
d. *a -stty*
e. *script -a*

12. Which of the following commands would you use to display a banner for *Mary*?
a. *demonstrate Mary*
b. *display Mary*
c. *show Mary*
d. *banner Mary*
e. *present Mary*

13. What command would you use to compile a C program named *Prog3.c* and save an object file (if compilation is successful) in a file named *Prog3.out*?
a. *cc -o Prog3.out Prog3.c*
b. *cc Prog3.c*
c. *gcc Prog3.c*
d. *./Prog3.c*
e. *cc Prog3.cc -o Prog3.out*

14. What sequence of the following steps/commands is needed to move a task/process already running in foreground to background?
a. hit *Ctrl-C* (to kill) and type *bg*
b. type *bg* and hit *Ctrl-Z* (to suspend)
c. hit *Ctrl-Z* (to suspend) and type *bg*
d. hit *Ctrl-U* (to kill) and type *bg*
e. type *bg* and hit *Ctrl-C* (to kill)

15. Say, that Linux assigned a job/task id number = *3* to the task running in background. What command would you use to move that task/process from background to foreground?
a. *fg 2*
b. *fg 1*
c. *fg 3*
d. *fg 4*
e. *fg 5*

16. Which of the following combination of keys would you press to erase (kill) the entire command on the command line?
a. *Ctrl-S*
b. *Ctrl-Q*
c. *Ctrl-Z*
d. *Ctrl-U*
e. *Ctrl-X*

17. Which of the following commands displays the process status?
a. sp
b. ls
c. man
d. ps
e. cp

18. Which of the following commands would you use to put a shell to sleep for 30 minutes hour?
a. sleep 1
b. sleep 1800
c. sleep 60
d. sleep
e. sleep 40

19. Which of the following commands identifies and displays users currently logged on into the Linux system?
a. who am i
b. who
c. date
d. ls
e. ps

20. The root directory in Linux is denoted by _____.
a. \ (backslash)
b. $
c. &
d. / (slash)
e. %

21. Look at the Linux directory diagram below. The correct <u>absolute</u> path leading to a file named *pay* residing in the *letters* directory is _____.
a. /programs/pay
b. /home/jmzura01/programs/pay
c. letters/pay
d. /home/jbcobb01/programs/pay
e. /home/jmzura01/letters/pay
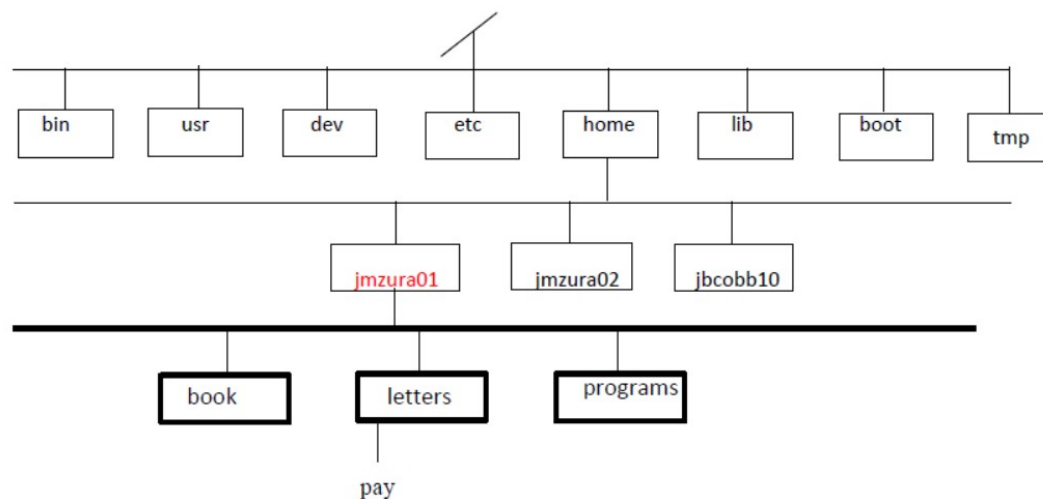

22. Look at the Linux directory diagram above. The correct <u>relative</u> path leading to a file named *pay* residing in the *letters* directory is _____. (Assume that **you are already in directory** *jmzura01*.)
a. /programs/pay
b. /home/jmzura01/programs/pay
c. letters/pay
d. /home/jbcobb01/programs/pay
e. /home/jmzura01/letters/pay

23. Which of the following Linux directories stores device drivers?
a. tmp
b. bin
c. lib
d. dev
e. etc

24. Which of the following are the features of Unix/Linux?
a. device independence
b. portability
c. powerful interface
d. asynchronous I/O
e. All the above

25. UNIX/Linux distinguishes between upper case and lower case, so "A" and "a" are different.
a. True
b. False

26. The get to the C shell you need to type *ksh* and press Enter.
a. True
b. False

27. What commercial or open version of Linux you have been using in this lab?
a. RedHat
b. Debian
*c. Ubuntu
d. Gentoo
e. X Windows

28. What is the name of the default shell that you have logged into in this lab?
a. Korn shell
b. C shell
c. Bourne shell
*d. Bourne Again shell or Bash shell
e. Joy shell

29. What is the name of the server on which Ubuntu Linux is running?
*a. Mercury
b. Virtual Desktop
c. PuTTy
d. Horizon
e. VMWare

30. Describe briefly which commands did not work and/or which places in the tutorial need improvement/clarification.
sleep 40 & - didn't get any actions after being terminated didn't say the time spent just 0:00
